Test Call Scripts: LAP Voice Agent

Before every call: answer the verification question as the customer (for example "Yes, speaking"), and say you can talk. Exceptions are noted in each test. Speak naturally with fillers ("umm", "yeah", "actually...").

For each call, record: recording link, transcript, PASS or FAIL, and any prompt fix you made.

Priority order if time is short: 1, 2, 3, 4, 5, 8, 9, 10, 11, 12. The rest are bonus.

A. Core scenarios

Test 1: Perfect eligible customer (happy path)

Say, as the agent asks each question, in your own words:

- "It's a residential flat."
- "It's my own, only my name."
- "Yeah, the original papers are at home."
- "I need around 50 lakhs."
- "I'm salaried, salary comes into my bank account."
- "Roughly 1 crore."
- "Maybe 10 years."

Expected: all 7 items captured, no repeated questions, then handoff message ("senior loan expert will call you back shortly with exact interest rates"), then the call ends.

Test 2: Agricultural property

- Property type: "It's agricultural land."

Expected: polite "do not meet the criteria for this specific offer at this time", **no further questions**, call ends.

Test 3: Cash income

- Answer questions 1 to 4 normally, then: "I run a small shop and mostly get paid in cash."

Expected: immediate polite disqualification and end. No questions about market value or tenure afterwards.

Test 4: No original documents

- Documents: "I only have photocopies, the originals are with the bank."

Expected: immediate disqualification and end.

Test 5: Tenure too short

- Answer everything normally, tenure: "2 years."

Expected: disqualification and end.

Test 6: Tenure too long

- Tenure: "20 years."

Expected: disqualification and end.

Test 7: Loan above the limit, customer accepts

- Loan amount: "I need 90 lakhs."
- When the agent offers 75 lakh: "Okay, 75 is fine."

Expected: agent explains the 75 lakh maximum, asks whether to proceed with 75 lakh, records ₹75 lakh, continues with the remaining questions.

Test 8: Existing loan (transfer)

- After the offer, say: "I already have a loan running on this property."

Expected: no eligibility questions, transfer-specialist message ("a specialist will contact you shortly"), call ends.

Test 9: EMI reduction (transfer)

- Answer one or two questions normally, then say: "Actually, I want to reduce my current EMI."

Expected: agent switches to the transfer branch mid-flow, gives the specialist message, ends the call.

Test 10: Busy customer

- At the start: "I'm in a meeting right now, can you call later?"
- When asked for a time: "Tomorrow evening around 6."

Expected: no pitch, asks for a callback time, confirms it, ends the call.

Test 11: Out-of-order answers (most important)

- When asked about property type, say in one go: "It's a residential house, jointly owned with my wife, worth about 1.2 crore, and I need 60 lakhs."

Expected: agent captures property type, ownership, market value and loan amount, and next asks only for **original documents**. It never re-asks the four you gave.

Test 12: Joint ownership

- Ownership: "It's in joint names with my brother."

Expected: treated as eligible, flow continues.

B. Natural speech and edge cases (bonus, but valuable)

Test 13: Interest-rate diversion

- Mid-flow: "Before that, what interest rate will you charge?"

Expected: agent does NOT invent a rate, says the senior expert will share it, then returns to the next unanswered question.

Test 14: Interruption

- While the agent is speaking a question, cut in: "Wait, what documents will you need?"

Expected: short answer (only from `additional_context_from_rag`, or a deferral to the expert), then back to the checklist.

Test 15: Self-correction

- Tenure: "10 years... actually make it 12."

Expected: tenure recorded as 12 and the call continues.

Test 16: Contradiction

- Property: "It's residential... actually no, it's agricultural land."

Expected: latest answer wins, so the agent disqualifies.

Test 17: Ambiguous answer

- Documents: "I think the papers are somewhere at home, not sure."

Expected: agent asks a clarifying question, does not assume yes.

Test 18: Skipped question gate

- Early on, ignore a question and ask a side question instead (for example "Where is your nearest branch?"), then answer the rest.

Expected: agent answers briefly or defers, then **goes back and asks the skipped item** before any handoff.

Test 19: Self-employed with bank income

- "I run my own business, all payments come to my bank account."

Expected: eligible (occupation = Self-employed, income = Bank).

Test 20: Hindi call (if time allows)

- Set `language_to_speak = Hindi` and run Test 1 in Hindi. Also set `agent_gender` and check the verb forms match.

Expected: stays in Hindi, gender-consistent speech.

Quick results table (fill this in)

#	Scenario	Result	Recording link	Notes / prompt fix
1	Happy path			
2	Agricultural			
3	Cash income			
4	No originals			
5	Tenure 2 yrs			
6	Tenure 20 yrs			
7	Above 75 lakh			
8	Existing loan			
9	EMI reduction			
10	Busy			
11	Out-of-order			
12	Joint ownership			

If a test fails, note exactly what the agent said wrong and send me the transcript. I'll tell you which line of the prompt to change.
